

Adept Ovine / Lamb Metal Detectable Weasand Clips

Metal Detectable Plastic Technology

Adept has developed a Metal Detectable Lamb Clip that performs as effectively as our original Lamb Clip in sealing the oesophagus and preventing ingesta leakage. The clip can be detected (in its full form) by metal detection equipment.

With an increased importance now being placed on removing plastics and other contaminants from pet food and rendering rawmaterial, Adept's Metal Detectable Clips can quickly be identified and removed.

The Metal Detectable Lamb Clip is available in both loose and cartridge forms and is compatible with all the Adept dispensing systems

- Closes to form a secure seal around the weasand (oesophagus), preventing leakage
- The weasand (oesophagus) is cleared of contents during application
- Clip can be detected by all industry standard metal detection technology
- Available loose or in 25 clip cartridge stacks
- Proven to reduce contamination
- Compatible with Adept Touchless or Manual Dispenser systems
- FDA and EU food contact approved

Product Code	0285-007 (Loose) 0664-007 (Cartridge)
Supplied	0285-007 - 6,000 QTY/Carton 0664-007 - 4,000 QTY/Carton
Colour Availability	Blue
Material	Metal Detectable Plastic
Dimensions	Type: 0285-007 0664-007 Length: 465mm 310mm Width: 320mm 260mm Height: 325mm 325mm Weight: 12.5KG 8.2KG
Dispensers	Manual Base 0739-820 Carousel 0739-810 (1000 Clip) Touchless Base 1020-850 Carousel 1020-930C (1000 Clip)
Applicator	Lamb Clip Rodder - 0142-050 Bladed Rodder – 0142-090
