

# Ovine / Lamb Metal Detectable Weasand Clips

0285-007 – Lamb Clip  
Metal Detectable

0664-007 – Lamb Clip Cartridge  
Metal Detectable

## Metal Detectable Plastic Technology

Adept has developed a Metal Detectable Lamb Clip that performs as effectively as our original Lamb Clip in sealing the oesophagus and preventing ingesta leakage. The clip can be detected (in its full form) by metal detection equipment.

With an increased importance now being placed on removing plastics and other contaminants from pet food and rendering raw material, Adept's Metal Detectable Clip can quickly be identified and removed.

The Metal Detectable Lamb Clip is available in both loose and cartridge forms and is compatible with all the Adept dispensing systems

- Closes to form a secure seal around the weasand (oesophagus), preventing leakage
- The weasand (oesophagus) is cleared of contents during application
- Clip can be detected by all industry standard metal detection technology
- Available loose or in 25 clip cartridge stacks
- Proven to reduce contamination
- Compatible with Adept Touchless or Manual Dispenser systems
- FDA and EU food contact approved
